SUMMARY

Results-driven technical product owner with 4+ years of experience in defining and prioritizing product requirements, collaborating with cross-functional teams, and driving product strategy in agile environments.

Key skills:

- Adept at leveraging data-driven insights and user-centric approaches to optimize product experiences and achieve business objectives.
- Bring a unique blend of technical acumen and business insight, allowing me to effectively bridge the gap between engineering and stakeholders.
- Proven ability to develop and execute successful growth strategies in fast-paced, innovative environments by leveraging market research and competitor analysis.
- Overall experience of over 18 years in various roles as a technical product owner, web and cloud architect, scrum master of co-sourced teams, full-stack developer, and agile practitioner.
- 8 years of experience in technical leadership role that involves interacting with stakeholders for requirements, planning, estimation, design, development, reviews, automation, implementing best practices and security audits

PROFESSIONAL EXPERIENCE

SAFe® Technical Product Owner

OPENTEXT DATA PROTECTOR: *Backup and disaster recovery solution for large, complex, and heterogeneous IT environments*

- Conducted extensive qualitative and quantitative user research to inform product decisions, enhancing the overall user experience and driving engagement.
- Partner with engineering teams to align on product vision and ensure seamless execution of growth initiatives.
- Prioritize product requirements and defects, working closely with stakeholders to define and execute the product strategy and roadmap.
- Manage all aspects of the product lifecycle, collaborating with engineering, partners, and support to drive product success.
- Document product requirements, lead requirement and technical reviews with internal stakeholders, and present implementation status updates to management.
- Monitored market trends, competitor strategies, and emerging technologies to inform product strategy and identify new growth opportunities.
- Communicated growth strategy, progress, and outcomes to stakeholders, fostering a culture of transparency and accountability.
- Managed cross-functional teams to deliver product enhancements that improved user satisfaction and retention.
- Monitored product performance metrics and made data-informed decisions to drive continuous improvement.
- Engage with customers to manage expectations and gather feedback, and incorporate insights into product development.
- Designed, guided and implemented various features as a web and cloud architect, and technical lead.

WORK EXPERIENCE

OpenText

(Formerly Hewlett Packard Enterprise)

Expert

October 2010 – Present

Spectron Electronics

Entrepreneur

May 2012 - May 2020

AXA

Senior Software Engineer

July 2007 - October 2010

Iqura Technologies

Software Engineer

September 2005 - July 2007

CERTIFICATIONS

SAFe certified Product Owner, SAFe certified Scrum Master, Product Roadmapping Micro-Certification (PRC), Product-Led Growth Micro-Certification (PLGC), Product Strategy Micro-Certification (PSC)

SKILLS

IaaS

Amazon Web Services, Microsoft Azure, Google Cloud Platform

Languages

JavaScript, TypeScript, Java, C#

Data Repository

PostgreSQL, Microsoft SQL Server

Frameworks / Libraries

Angular, Docker, Spring framework

Cloud Architect

COMMON APPLICATION FRAMEWORK (CAF): *Massively scalable and highly available collection of microservices*

- SaaS based microservices for Identity, Storage, Analytics, Auditing, Telemetry, and Data Processing
- Played the role of an architect, SAFe® scrum master and developer on CAF Telemetry
- Designed and implemented Docker container strategy for CAF
- Researched and defined continuous integration (CI) and continuous delivery (CD) methodologies with Docker, Maven, Jenkins and Artifactory
- Instrumental in choosing Java framework for CAF Telemetry and opensource identity manager for CAF IDM
- Integrated Liquibase to managing and applying database schema changes
- Completed production setup and deployment of highly available cluster of CAF Telemetry on AWS using Apache Mesos and Marathon

Full-Stack Developer

CONNECTED MX (CMX): *Enterprise endpoint protection*

- Integral part of team which chose AngularJS as Web framework in 2013
- Integrated Typescript with AngularJS
- Developed the file browse, policy management, asset sharing and restore components
- Developed REST APIs based on OpenAPI standards
- PostgreSQL was used as a data repository
- Orchestrated infrastructure management and deployment using Puppet

ADDITIONAL INFORMATION

Passions and Interests:

- Enthusiastic about learning new technologies, with a strong interest in opensource, cybersecurity, cloud architecture and emerging web technologies.
- Self-hosting aficionado
- Avid gamer
